Pine Street Water Main

In early November the Water & Sewer Division began the preparation work for the Pine Street Water Main Replacement. The city will be installing a new 6" water main to replace the existing 2" main that is currently serving the customers on Pine Street between 13th Street and 17th Street.

The first step was to make saw cuts in the concrete pavement to have access for the work to proceed. Now the crews are ready to start laying the new line down Pine Street. Once the new line is in place, residences along the way will have their service transferred from the old line.

This work will be completed a block at a time and will progress throughout the winter months as the weather will allow. During the construction process there will be parking restrictions in place from time-to-time. On street parking will be prohibited between the hours of 7:30am and 4:30pm. The street will be posted 48 prior to the beginning of the parking restrictions.

While the process will cause some unavoidable inconveniences to the residents of the area, the long-term benefits will outweigh the short-term difficulties. The outcome will mean improved water pressure and quality in the area.

Workers install a tapping saddle on the current 6" line on 13th Street in preparation for the construction of the new line.

New pipe is laid out down Pine Street.
